## MORSE 86 DRUM LIFTER

### Specification:

- Made of carbon steel painted blue
- It is used to lift the loaded drum with your crane connected to the hook.
- Lift steel, plastic or fiber drum
- Capacity: **1,000 Lb. (454 kg)**
- **22" to 23.5" (55.9 cm to 59.7 cm)** diameter
- **23" to 38" (58.4 cm to 96.5 cm)** tall
- Accepts Diameter Adaptors for smaller drum down to **14" (35.6 cm)** diameter
- Used in Docks and mezzanines, Oil rigs and other marine applications, Construction sites

## MORCHINCH DRUM HANDLING SYSTEM

### Specification:

- The Morcinch Drum Handling System is primarily used for securing drums during transportation.
- It ensures that drums remain stable and secure, reducing the risk of accidents or spills while they are being moved.
- Automatic adjustment to accommodate drums with a diameter range of **22" to 23.5" (55 to 59.7 cm)**.
- Used Marine Industries, Oil drilling and refineries, Mining, Paint, Chemical and radioactive productions, Factories Raw material and waste management.

## FORK MOUNT DRUM HANDLER

### Specification:

- Designed to improve safety & enhance efficiency when handling drums made of plastic, steel, or fiber.
- Single or Double Drum handling
- Fork size **125x50mm** at **620mm** centres
- **12V** DC Battery
- A complete **180°** to facilitate pouring
- **15 to 55 gallon** drum tilter or **55 to 210 liter**
- Maximum Capacity at **1500 Lb** or **680 kg**
- Fork Mount Drum Handlers are used in various industries for safely lifting and transporting drums with forklifts.

## DRUM DOLLIES

### Specification:

- Drum dollies allow you to easily move a drum
- These are commonly referred to as **55-gallon** drum handling equipment or drum dollies with handles.
- Capacity of up to 1,000 pounds (0.5 tons).
- Available in various sizes, ranging from **15-gallon** drum dollies to **55-gallon** drum dollies.
- Morse drum dollies are commonly used in industrial sectors such as manufacturing, warehousing, logistics, and waste management for easy transportation of drums.

# DRUM HAND TRUCK

## Specification:

- Designed to transport drums, typically made of steel or plastic, safely and efficiently.
- These drums often contain liquids, chemicals, or other materials.
- Used across various sectors such as manufacturing, warehousing, construction, oil and gas & more.
- Model **160 4-Wheel Drum Truck**- Weight Capacity: **1000 pounds (454 kilograms)**
